

Zafrin Akther Binty

I'm a passionate Computer Science student who loves learning about software development and user-friendly design.

I enjoy solving real-world problems. I'm a quick learner, creative thinker, and always eager to explore new technologies. My goal is to build projects that make people's lives easier and more connected through technology.

S.S.C. (Science), Tejgaon Adarsha School and College, Dhaka — 2019

Skill

- HTML/CSS
- UI/UX
- Project Management
- Java
- Figma
- Canva
- MySQL/Firebase

Projects

Restaurant Management System (JavaFX, MySQL)

Developed a desktop-based restaurant management system to manage customers, food orders, menu items, and revenue tracking. Implemented full CRUD operations and real-time data updates using JavaFX and MySQL.

Cookify App (Android - Java, XML, Firebase)

Created a recipe recommendation app that suggests dishes based on available pantry items. Integrated Firebase Authentication and Realtime Database with a responsive mobile UI.

Career Compass (React.js, Firebase)

Built a career guidance web platform that analyzes user skills and suggests suitable career paths. Utilized Firebase for authentication and data storage with a clean, responsive React interface.
